ALL IN TECHNOLOGIES was established with the vision to introduce Occupational Health and Environmental Safety Solutions in Bangladesh. Throughout the years, it has gone from strength to strength, building upon its close working relationship with the renowned principal **3M™** as an authorized distributor in the field of Personal Safety Division for Bangladesh.

RESPIRATORY PROTECTION

Millions of people are required to wear respirators in various workplaces throughout the Country. Respirators protect workers against insufficient oxygen environments, harmful dusts, fogs, smokes, mists, gases, vapors, and sprays. These hazards may cause cancer, lung impairment, diseases, or death. Compliance with the NIOSH-approved **3M™** Respiratory Protection Standard could avert hundreds of deaths and thousands of illnesses annually. There are two main categories of respiratory protection based on uses and types,

- disposable respirators and
- reusable respirators.

Another important part of reusable respirators are accessories based on types, environment and uses.

HEARING PROTECTION

The surest methods of preventing noise-induced hearing loss (NIHL) is to eliminate the source, or to reduce noise at the source by engineering methods. However, in certain situations, these measures are not possible. In such workplaces, workers may need to wear hearing protectors to reduce the amount of noise reaching the ears.

People should wear a hearing protector if the noise or sound level they are exposed to is close to or greater than the occupational exposure limits (OEL) for noise. For most jurisdictions, this occupational exposure limit is 85 decibels (A-weighted) or dBA. Hearing protectors reduce the noise exposure level and the risk of hearing loss when worn correctly. Type of hearing protectors available ; **Earplugs | Semi-insert earplugs | Earmuffs**

Choose 3M™ Versaflo™ Systems for powered air purifying respirators.

When comfort is designed into respiratory protection products, concern can focus on the work and not the PPE. The 3M™ Versaflo™ Powered Air Purifying Respirator (PAPR) is engineered for versatility and customization, so safety managers can build the system that works for their employees. Choose from a wide range of headgear, breathing tubes and blower units to customize a PAPR solution that works for your environments.

TR-300+ PAPR

High efficiency (HEPA) filter only

- **Cleaning:** Wipe down only
- **Headtop Compatibility:** M-Series, S-Series, H-Series, L-Series SG, BE-Series
- **Motor Blower Weight:** w/o battery pack approx. ~0.85 lbs.
- **Intrinsically Safe:** No

TR-600 PAPR

HEPA filter plus multiple chemical cartridges

- **Cleaning:** Wipe down, rinse or submerge using TR-653 Cleaning & Storage Kit
- **Headtop Compatibility:** M-Series, S-Series, H-Series, 3M™ Speedglas™ Welding Helmets
- **Motor Blower Weight:** w/o battery pack approx. ~1.4 lbs.
- **Intrinsically Safe:** No

TR-800 PAPR

Intrinsically safe motor/blower with HEPA filter plus multiple chemical cartridges

- **Cleaning:** Wipe down, rinse or submerge using TR-653 Cleaning & Storage Kit
- **Headtop Compatibility:** M-Series, S-Series
- **Motor Blower Weight:** w/o battery pack approx. ~1.5 lbs.
- **Intrinsically Safe:** Yes - Blower with battery certified to UL/IEC 60079 (2013)
